PRESS RELEASE

FORT SMITH, AR -- The Fort Smith Regional Airport has gone wireless and is Fort Smith's newest Wi-Fi hotspot!

In cooperation with Cox Communications, the Fort Smith Regional Airport has installed a wireless fidelity system in the commercial airline terminal that gives passengers internet accessibility while enjoying the comfort of the airport lobby and passenger lounge. It provides wireless broadband connection at speeds up to 200 times faster than dial-up service.

This feature now allows travelers the ability to browse the web, connect to their office networks, send and receive e-mails or chat through instant messaging while waiting for their flights.

All you need, to access the airport WiFi, is a laptop or handheld device with a WiFi compatible IEEE 802.11b/g network card installed.

As always, the Fort Smith Regional Airport is committed to meet the needs of airline customers who choose to "Simply Fly Forth Smith."
