

## **Detailed list of Permitted and Prohibited Items, Visit [www.tsa.gov](http://www.tsa.gov)**

TSA released their **3-1-1 Program** regarding liquids, aerosols and gels in carry-on luggage.

**3-1-1 is:**

- 3 ounces or less size containers of liquids, gels or aerosols
- 1 quart-size, clear plastic, zip-top bag holding 3 ounces or less containers
- 1 bag per traveler placed in the security bin at the checkpoint

**In a nutshell: travelers may carry through security checkpoints travel-size toiletries that are 3 ounces or less per container; all containers must fit comfortably in ONE QUART-SIZE, clear plastic, zip-top bag. Only ONE Quart-Size bag per Traveler is allowed.**

At the checkpoint travelers will be asked to remove the zip-top bag of liquids and place it in a bin or on the conveyor belt. X-raying separately will allow TSA security officers to more easily examine the declared items.

In addition, larger amounts of prescription liquid medications, baby formula and diabetic glucose treatments must be declared at the checkpoint for additional screening.

In addition to the above changes, the following guidance is provided to ensure the health and welfare of certain air travelers the following items are permitted.

- Baby formula and breast milk if a baby or small child is traveling;
- All prescription and over-the-counter medications (liquids, gels, and aerosols) including KY jelly, eye drops, and saline solution for medical purposes;
- Liquids including water, juice, or liquid nutrition or gels for passengers with a disability or medical condition;
- Life-support and life-sustaining liquids such as bone marrow, blood products, and transplant organs;
- Items used to augment the body for medical or cosmetic reasons such as mastectomy products, prosthetic breasts, bras or shells containing gels, saline solution, or other liquids; and,
- Gels or frozen liquids needed to cool disability or medically related items used by persons with disabilities or medical conditions.

You are not limited in the amount or volume of these items you may bring in your carry-on baggage. BUT if the medically necessary items exceed 3 ounces or are not contained in a one-quart, zip-top plastic bag, you MUST declare to one of our Security Officers at the checkpoint for further inspection.

You are permitted to bring solid cosmetics and personal hygiene items as such lipstick, lip balm and similar solids.

Please keep in mind, that while we cannot provide an exhaustive list of items covering all eventualities, all liquids, gels, or aerosols of any kind are prohibited at security checkpoints, in airport sterile areas, and aboard aircraft. You can pack these items in your checked baggage.

We ask for your cooperation in the screening process by being prepared before you arrive. We also ask that you follow the guidelines above and try not to over-think these guidelines. Please pack liquids, gels, and aerosols in your checked baggage even if you do not normally check a bag.

In addition to liquids, gels, and aerosols numerous other potentially dangerous items are not permitted in carry-on baggage. We strongly encourage travelers to read more about previously prohibited items to avoid complications during screening.

To help you understand and navigate the new security measures, please go to [www.tsa.gov](http://www.tsa.gov)

It is unlikely that additional changes in the liquid, aerosol and gel policy will be made in the near future.

This security regimen applies to all domestic and international flights departing U.S. airports. Travelers should, however, check with transportation security authorities in their country-of-origin for flights originating at non-U.S. airports.

**Detailed list of items is available at [www.tsa.gov](http://www.tsa.gov)**

## Makeup & Personal Items

	Carry-on	Checked
Aerosol spray bottles and cans	Yes - Less than 3 oz.	Yes
<b>All</b> creams and lotions including Neosporin or first-aid creams and ointments, topical or rash creams and ointments, suntan lotions, moisturizers, etc.	Yes - Less than 3 oz.	Yes
