

Do you have a frequent air traveler in your life? If you do, you need to visit the Fort Smith Regional Airport's web site and check out the airport's new Flight Information Display System (FIDS). The FIDS system gives detailed up-to-date information regarding the status of airline arrivals and departures at the Fort Smith. Simply log on to [www.fortsmithairport.com](http://www.fortsmithairport.com) and click on the 'Flight Status' link on the Home page.

Other options for checking your flight status include calling the airlines directly, checking websites for the individual airlines or going to [www.flightaware.com](http://www.flightaware.com). At that site you will enter your flight number or the airport code. The airport codes are: Fort Smith – FSM; Dallas Fort Worth – DFW; Atlanta – ATL; and Memphis – MEM.

Did you know that you can have the airline notify you by phone or e-mail of any flight changes including delays and cancellations? Just visit the airlines websites at [www.aa.com](http://www.aa.com) for American, [www.nwa.com](http://www.nwa.com) for Northwest, and [www.delta.com](http://www.delta.com) for Delta for your custom information.
